Calendar Explanation

ॐ वक्रतुंड महाकाय कोटिसूर्यसमप्रभ निर्विघ्नं कुरु मे देव सर्वकार्येषु सर्वदा।
वशिष्टा। यस्मिन् पक्षे यत्र काले येन दृग्गणितव्यम्। दृश्यते तेन पक्षेण कुर्यात्तिथ्यादिनिर्णयम्।
भास्कराचार्या। यात्राविवाहोत्सवजातकादौ खेटेः स्फुटैर्वफलस्फुटत्वम्। स्यात्प्रोच्यते तेन नभश्चराणां स्फुटक्रिया दृग्गणितव्यकुद्या।

We are pleased to release the 2012 calendar based on Hindu dharma shastra and drika siddhanta. This calendar is specially prepared for the Mumbai, India, and it may not be applicable in other parts of the world.

People usually align the Hindu festivals with the English dates based on the Indian calendar. They think that if an Indian calendar says "Janmashami" on a certain date, say September 2nd 2010, then it will appear as September 2nd everywhere in the world. The USA is 10:30 to 15:30 hours behind India, so some people will think it will also come the next day in the USA, i.e. September 3rd 2010. They also argue that their family priest in India has told them to celebrate on this particular date and according to him the Indian calendar will apply to all places in the world. This is a completely wrong assumption. If the Earth was flat then you can use Indian calendar everywhere as sunrise sunset will happen all places equally. We won't have any timezones and the world will have only one timezone. Surya Siddhanta, Maharishi Vashista, Bhaskaracharya taught us to prepare the panchangam based on the longitude, latitude of the place you live for these reasons you cannot bring a calendar from India and use abroad.

The English date and changes at midnight; whereas the Hindu date (or Tithi) and day does not change at midnight. Hindu day changes at Sunrise. All days are from one Sunrise to another Sunrise. Sunday will start at one Sunrise and end at the next Sunrise. The Hindu date – the Tithi changes depending on the position of the Sun and Moon. It can change anytime between two Sunrises. That is to say that if Prathama Tithi ends today at 23:02 it does not mean that Dwitiya Tithi will end tomorrow at the same time. It can end at 18:00, 18:09 or later.

Tithi: In the lunar calendar the Moon takes a month for each revolution around the Earth. The lunar calendar is divided into two groups called Pakshas. The first one is called Krishna Paksha (or dark fortnight) or waning moon. The second is called Shukla Paksha (or bright fortnight) or waxing moon. Each Paksha is divided into 15 Tithis. The first 14 Tithis are the Sanskrit numbers from 1 to 14 (Prathama, Dvithiya etc). The 15th Tithi of Shukla Paksha is Poornima (full Moon) & the 15th of the Krishna Paksha is Amavasya (Moon is not visible as it is closest to the Sun).

Lunar Month: A lunar month consists of 30 Tithis and each Tithi then corresponds to the time taken by the Moon to move 12 degrees with respect to the Sun. Krishna Paksha Tithis are in the darker color and Shukla Paksha Tithis are mentioned in the red color. Names of lunar months are Chaitra, Vaishakh, Jyestha, Ashadha, Shraavana, Bhadrapada, Ashwayuja, Kartika, Margasira, Pushya, Maha, and Phalgun.

Solar Month: A solar month begins when the Sun leaves one rasi and moves into the next. The solar month names are based on 12 signs, they are Mesha, Vrishbha, Mithuna, Karka, Simha, Kanya, Tula, Vrishchika, Dhanush, Makara, Kumbha, and Mina. This system is widely used in Tamilnadu, Kerala, West Bengal, Orrisa, Punjab and Assam.

Nakshatra: The path of the moon around earth is divided into 27 segments or Nakshatras. A nakshatra changes when the moon leaves one of these 27 segments and enters the next. Nakshatras are in *italics*. They are Ashwini, Bharani, Kritika, Rohini, Mrisgashirsh, Ardra, Punarvasu, Pushya, Ashlesha, Magha, Poorva Phalguni, Uttara Phalguni, Hasta, Chitra, Swati, Vishakha, Anuradha, Jyestha, Moola, Poorva Shadha, Uttara Shadha, Shraavan, Dhanishtha, Shatabhisha, Poorva Bhadra, Uttara Bhadra and Revati.

Timings listed in the Calendar: The Tithi & Nakshatra times indicate a time when the Tithi or Nakshatra ends. The Panchanga uses the Vedic definition of a day, i.e., A day starts with Sunrise and ends with the subsequent Sunrise. Thus, a Tithi with a time of 29:00 indicates that the Tithi ends past midnight but before the next Sunrise at 5:00 AM (29:00 – 24:00) on the next calendar day. Hence 24:00 means 00:00 hours of the next day, 25:00 means 1:00 AM of the next day, and 29:00 means 5:00 AM of the next day. This is standard time notation for any Panchangam. The time for Sun's samkramana is when Sun will enter that rasi or sign on that day. e.g. Makara 4:36 means Sun is entering Makara rasi at 4 hour 36 minute. All other times are the ending times.

How festival dates are determined? The usual rule to observe a festival is to check the Tithi prevailing at the Sunrise. Each festival has different rules. For example Ganesh Chaturthi has to be observed when the Chaturthi Tithi is observed during the 8th/15th part of the dinmana. The dinmana is the difference between local Sunset and Sunrise. If Chaturthi is not prevailing during that period then take the second day.

For example, if one Tithi is observed at moonrise in India it may or may not exist during moonrise on the same day in a different part of the world. If you are in America then it will be observed on previous day or the

next day if you are in Japan, Fiji, Australia and other countries. For example if a total lunar eclipse is visible in India at 5:00 AM it will happen on the previous day in the USA. For these reasons Indian Panchangam you bring from India cannot be used outside of India.

Uttarayana / Dakshinayana: The season occur based on earth's position around the Sun. This is due to Earth's tilt of 23.45 degrees. The Earth circles around Sun with this tilt. When the tilt is facing the Sun we get summer and when the tilt is away from the Sun we get winter. Because of this tilt it seems like the Sun travels north and south of the equator. The Uttarayana is the Sun appearing to move north. The Dakshinayana is the Sun appearing to move towards South. This causes rise to seasons and dependent on equinoxes and solstices.

There is a common misconception that Makar Samkranti is the Uttarayana. This is because at one point in time Sayana and Nirayana Zodiac were same. Every year equinoxes slides by 50 seconds due to precision of equinoxes, giving birth to Ayanamsha and causing Makar Samkranti to slide further. As a result if you think Makar Samkranti is Uttarayana then as it is sliding it will come in June after 9000 years. However Makar Samkranti still holds importance in our rituals as a Samkranti. All Drika Panchanga makers will use the position of the tropical Sun to determine Uttarayana and Dakshinayana. Hence January 14th isn't Uttarayana. Actual Uttarayana occurs on December 21st/22nd of every year. For more details please visit <http://www.mypanchang.com> or write to shastriji@mypanchang.com.

About myPanchang.com: myPanchang.com is the leading panchang maker providing the most accurate panchangam in English and various Indian languages and panchangam for over more than 394 cities all over the world based on highly accurate driga ganitha or thiruganitha. Most temples in the world rely on myPanchang.com for accurate Panchang data and festival observance times. Please visit myPanchang.com for more details. If you have any questions about confusion about any festival please contact myPanchang.com

31	07:14	18:29	12:08	15:41-17:05	10:03-11:27	12:52-14:16	12:29-13:14	09:29-10:14, 23:35-24:26	13:44-15:32	24:33-26:22

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.

Notes: To find auspicious time one need to avoid inauspicious times like Rahukalam, Yamagandam, Gulikai, Durmuhurtham and Varjyam times. Abhijit Muhurtha and Amritkalam times are good times. If the times in Abhijit muhurtha and Amritkalam times are overlapped by inauspicious times we need to remove inauspicious times and use only auspicious times, after removing inauspicious times from Abhijit muhurtha and Amritkalam times.
